Warlords 2 in THREE 1.2--Warlords 2 Style Units/Heroes for Warlords 3.

New in 1.2

Updated units particularly gnolls to match more closely the game's illustrative depiction (greenskin, size and armor additions)

--and halflings (SH-halfing braves and standard halflings in appearance more closely)

--resized giant bees to be smaller, they looked TOO gigantic for their stats

--imps totally redone to be bigger and more intimidating to better match their stats

--water elemental (which is used as a "ship"); redone with face from its illustration

--rats replaced with another, smaller graphic

--various minor graphic updates to other units

--orc mobs look more "mobby";

--troll updated to better fit in with LOTR maps

Introduction

Enamored with the Warlords 2 style of unit sprites, I wanted to see something similar in Warlords 3!

Warlords 2 in THREE 1.0--Warlords 2 Style Units/Heroes for Warlords 3.

bySteamWarlord at the Warlords.com forum

What this does:

Replaces the sprite graphics of Warlords 3 DLR Army and hero units with the style seen in Warlords II classic and Deluxe.

Should work in new GOG release.

For both Standard armies and STORMHEIM sets.

KH and standard Heroes

NO stats have been changed

SteamWarlord,

This looks really cool. I wish you had uploaded something like this 10 years ago.

I've uploaded a copy to the site and will add it to the downloads section soon.

Thank you for your kind words.

FYI Just added update v1.1 and (later EDIT) Christmas update 1.2...

Wish I had the ambition 10 years ago

Got it out though just in time for the new GOG release of these games which I had no idea was going to happen.

From what I gather the release of Dark Lords Rising has the KH heroes and STORMHEIM sets which this includes graphics for them.

FYI I was looking at the castles, and in another thread, announced the release of Warlords3 Citadel BLGs, which makes citadels easier to identify on the map...

Adds a bulding in the yard of Citadels to more easily identify them from lower level cities
