

What is the difference?

Posted by Hermskii - 27 Dec 2014 07:47

What is the difference between Warlords II and Warlords II Delux? I'm about to go online and buy one if not both but the question does arise. I am used to the one that starts with a picture of a boat and the masked warrior saying "Greetings Warlord";

If I recall the face then goes away and I pick a scenario. I don't recall how I ever started playing this game being I keep everything and I don't have the software or the box for this game so I have no idea how I originally got so hooked. For that reason I have no idea for sure which version I found first. I recall getting Warlords III and loving it too. I actually still have it.

You must be playing a custom scenario. The default units are exactly the same in War2 and War2 Deluxe.

However custom scenarios have all kinds of units (space themes, western theme, WWI theme etc) with all kinds of abilities. When playing those you absolutely need to check out the unit powers because often they are wildly unbalanced.

I started Warlords II Deluxe. I selected to start a new scenario. I found one with 100 cities called Transylvania and set it to I am the greatest and hit start.

So I guess that is another difference then being the Deluxe version has these custom scenarios? It has tons of them too.

The original Warlords 2 has those same scenarios if you bought the Scenario Builder expansion.

I think there were 50+ or more that came with it plus the ability to create your own of which there are tons to download.
