

Suggestions for 1.06

Posted by Seppuccu - 01 Feb 2011 18:24

Seems I'll have to be the one breaking the ice in the W4 sub-forum. ^^

I was thinking we could get back to some of the 1.06 discussions. Before the old site went down I had luckily collected almost all of the suggestions for 1.06 and put them together in a spreadsheet. I've attached the spreadsheet to this post. Read and ponder.

Edit: wtf, can't upload file...

Is Steve still working there, or did the company change name?

I2 is alive and strong and has been working for the past couple years on [Gems of War](#), a Match-3 game kind of in the vein of Puzzle Quest. It's available on Steam (Free to Play), Mobile, PS4, and Xbox (only the first two are connected to each other though). This is their focus now.

Seems I'm condemned to die without having seen the next W4 patch... 🙄
