Onslaught,

Why are you reducing the max heroes from 5 to 3? That's a pretty big drop and means you can't even get 1 duplicate hero if you want to get 1 of each in the scenario. Heroes are already hard enough to come by that limiting them to 3 seems overly harsh. I can see maybe lowering it 4.

That Pale Rider is going to be a serious beast with those super stats (Disease and move). How about at least lowering the disease part to 12. I also don't think Ghosts need 3 HP if they are going to be Siege units. They will naturally be at the back of stacks since they have a bonus so 2 hits is fine for them.

It is true that there will be less hero variety with 3 heroes but it will also be a more focused game. At least for an amateur player such as myself, more than 3 heroes are really hard to tend to.

I agree about the hit points on ghosts. The alternative is to reduce siege to +1 but that just is not very useful for a slot 2 merc i think.

The pale rider is mighty for sure but considering that Dark Elves have life drain -1 unit among regulars, I don't think it is overly powerful. Perhaps the life drain unit need to increase in price or become a 5 turn unit?

Onslaught,

Interesting comment about 3 heroes being more focused. That was not why I expected the change. To me 3 heroes seems limiting and really means the loss of 1 hero can be a game changer because you can't have a lot of replacements in training. As you know its very hard to level up low level heroes in

mid/late game.

Leave Ghosts with +2 siege. Black needs at least +2 siege more than they need 3 hit Ghosts with +1 siege.

The lifedrain unit is indeed very powerful. But at 4 turns it takes a long time to make. Also lifedrain is useless against units with 1 hit and there are a fair number of those on various sides. So 4 turns seems fair. I can't recall the cost to buy one but it should be around 1000 or more. The Pale Rider with disease +20 is basically the same as Lifedrain (disease +25 = 100 disease) but this unit is 9/4 (I think the lifedrain unit is only 7/2) and moves an incredible 30 moves. It's those moves and the 4 hit immunity to archery that puts it over the top. I can live with 20 disease if the 9/4 dropped to 9/3 and the moves to 24.

I changed pale rider to disease 16, move 26, 9 str/ 4 hp. Does this sound more reasonable to you?

Also changed dark elves devourers from necromancy +2 to poison +8.
